THE MOSAIC IN ME

Mosaic has always held a special place in these lands we call home. Many civilizations that have lived before us have perfected mosaic artisanship and adorned their palaces, places of worship, streets and even homes with different types of mosaic.

The oldest mosaics found in Mesopotamia weren't just decorative, they also protected the buildings from wind and rain.

Sounds familiar doesn't it?

After seeing this similarity in clothes and mosaics, we wanted to take inspiration from this beautiful and practical art form by way of incorporating used/found materials or handmade aspects, including many different colors and fabrics, creating some mosaic inspired prints and embroideries and using some imagery that are special to these lands like the evil eye or the sunflower.

Like a mosaic, we brought together many different ingredients to create a cohesive collection and emit certain feelings of togetherness and acceptance.

Our country and the world at large are just like these mosaics.
Thousands of pieces making up a whole which emits great beauty.

It's good to remember this.
